## UNDER THE SEA

Designs from the deep are a great way to add a coastal flair into any interior scheme.

TEXT BY KIM MOSLEY

Island style with its unparalleled tranquility and welcoming beauty has made coastal living the perfect balance of comfort and luxury. Inspired by nature, these shell-savvy motifs from the deep have made their way inland to become the latest in trendsetting decor.

Perhaps Mother Nature's most beautiful creations: shells, coral, sea fans and even starfish — which legend has it are the reflection of heavenly stars imprisoned within the waves — fuse the essence of the ocean with indoor innovation. Seafarers and landlubbers alike are embracing the art of shelling, embedding these sculptural treasures into anything and everything from window frames and fireplaces to shelves, beds and mirrors.

**ABOVE:** "Coral Point Dune," left, and "Coral Point Nautical" accent pillows. Courtesy of Barclay Butera Home.

**TOP:** Seashell mirror encrusted with large scallops, white arks, tulips, conchs and other seashells mixed with coral. Courtesy of Pacific Rim Home.
